SERGIO MARTÍNEZ

Spain (CET) | sergio@zkzoomer.io | github.com/zkzoomer | zkzoomer.io | linkedin.com/in/sergiomartc

Senior ZK Protocol engineer with an aerospace background. Experience shipping production ZKsync (Ethereum L2) protocol upgrades across Solidity smart contracts and Rust node infrastructure. Focused on interoperability, upgradeability, execution efficiency, and reliable protocol delivery.

PROFESSIONAL EXPERIENCE

Senior Protocol Engineer at Matter Labs **Remote**
Engineering Team *Mar 2025 – Jul 2026*

- DRI for ZKsync v29 upgrade, coordinating contract and server work for native interoperability support.
- Productionized protocol changes across contracts, node/server, storage, APIs, and integration test suites.
- Contributed to v29/v31 contract development: implementation, testing, reviews, and production readiness.
- Turned large release branches into focused PRs, improving code review quality and reducing release risk.
- Open source PRs: server #4221, #4730, #4769, #4756, #4608; contract contributions on: #1419, #1947.

ZK Protocol Engineer at Term Structure **Taipei, Taiwan (R.O.C.)**
Blockchain / ZK Team *Aug 2023 – Oct 2024*

- Designed and built a custom zkVM for a rollup-based DeFi lending and borrowing platform.
- Designed an intent-based v2 of the Term Structure protocol, reducing costs and enabling upgradeability.

Grantee for the Ethereum Foundation **Remote**
Privacy and Scaling Explorations, Semaphore *Jan – May 2023*

- Built a full-stack decentralized, private, and verifiable education platform using PSE Semaphore.

Software Engineering Intern at Airbus Defence and Space **Madrid, Spain**
Computer Vision Team, Flight Test Department *Feb – Jul 2021*

- Developed a software simulation tool for evaluating different lidar sensors under flight test scenarios.

EDUCATION

ISAE-SUPAERO **Toulouse, France**
MSc in Aerospace Engineering. Major: Embedded Systems *2021 – 2023*

- Researched scaling solutions based on ZK-proofs for embedded blockchains, published as IEEE paper.

Polytechnic University of Madrid **Madrid, Spain**
BSc in Aerospace Engineering. Major: Aerospace Sciences and Technologies *2016 – 2021*

- GPA: 8/10, top 10%. Special distinction in 8 subjects covering Math, Physics, and Computer Science.

Polytechnic University of Madrid **Madrid, Spain**
Business Analysis with Big Data for the Industry *Oct – Dec 2020*

SELECTED PROJECTS, GRANTS & RECOGNITION

Selected Participant, Succinct ZK Residency **Sep – Oct 2024**

- Focused ZK residency with builders from across the industry, built an infinitely scalable auction protocol.

Mina Growth Track Grant Recipient **Aug – Dec 2024**

- Developed an ERC-4337-like standard on Mina, enabling account abstraction with non-native signatures.

ETHGlobal Istanbul Hackathon Winner **Nov 2023**

ETHGlobal Paris Hackathon Winner **Jul 2023**

Filecoin Web3 Infinity Hackathon Winner **Aug 2022**

Python EVM-Based Telegram Trading Bot **Aug 2021**

- Sold 10 licenses for a Telegram DeFi trading bot I built and maintained.

ADDITIONAL INFORMATION

Languages:

- Spanish: native
- English: bilingual (Cambridge C2, 220/230)
- French B1

Technical Skills:

- Rust, Solidity, Circom, Python, TypeScript
- Ethereum/EVM, Rollups, ZK, zkVMs
- Tools: Git, Docker, Linux
